

MIS JOB MARKET INSIGHTS

A Data-Driven Placement Strategy Briefing for ACC Leadership

What We'll Cover

01 Market Landscape

Where MIS hiring actually happens — industries, companies, departments

02 Skills & Talent

What employers ask for, and who actually gets hired as a fresher

03 Compensation

What the market really pays, by role, industry, experience, and city

04 Strategy & Roadmap

What this means for ACC's training, counselling, and placement plan

EXECUTIVE SUMMARY

A Large Market, With a Narrow Path In

50,942

Job postings analyzed

20

Distinct MIS titles tracked

14.9%

Of demand open to freshers

₹3.98L

Average reported salary

- 50,942 postings sounds , but only 14.9% of that demand is open to a first-time applicant.
- Financial MIS Executive is the single most-demanded title; five roles together cover most fresher-level hiring.
- Excel and Communication top their respective skill rankings by a wide margin — the baseline is well defined.
- Average pay (₹3.98L) sits well above median (₹3L) — a small number of senior postings pull the headline up.

The Market at a Glance

50,942

Total MIS Jobs

11,322

Companies

600

Cities

26

Industries

7

Departments

6

Company Types

Banking Dominates Industry Demand

Banking alone (8,800) posts nearly double Consulting and more than the next five industries combined.

Ten Employers Anchor the Market

Accenture alone posts more than 3x its nearest competitor — a natural first target for outreach.

MIS Is the Department

Estimated from the dashboard's treemap block areas. Finance and Sales are the two functions leaning on MIS people most.

Private Sector Owns This Market

Work Mode Within Private-Sector Postings

Hybrid	7,200
On-site	5,500
Remote	1,500

MNC and Startup/Enterprise hiring is close to a rounding error — 0.6% of postings combined.

Excel Leads Every Other Technical Skill

29,769 technical-skill mentions across postings — Excel, Reporting, SQL, and Power BI form the non-negotiable core.

Communication Outweighs Every Other Soft Skill

More than double the second-place skill. An MIS role is, at its core, translating data for someone else to act on.

A Bachelor's-Degree Market

BASELINE

Bachelor's Degree

Dominant across ~30 tracked education categories

DIFFERENTIATOR

MBA / Master's

Smaller, consistent second tier — accelerates progression

SPECIALIST

B.E. / Commerce-CA / Diploma

Smaller still — relevant for specific technical or finance tracks

The Single Most Important Number in This Deck

Only 14.9% of postings are open to a first-time applicant.

Most of what looks like open demand is, in practice, closed to a fresher — regardless of how well they interview. Realistic planning has to work backward from the smaller accessible slice, not the headline total of 50,942.

Five Roles Cover Most Fresher Demand

The top 5 titles account for ~75% of all fresher-tagged openings shown on the dashboard.

What the Market Actually Pays

₹3.98L

Average Salary

₹3.00L

Median Salary

₹2–5L

Most Common Range

₹50L

Highest Offered

Average sits well above median — a right-skewed market. Anchor expectations to the ₹2–5L band, not the average.

Only 21% of postings (10,678 of 50,942) disclose salary at all — every figure here describes that disclosed subset.

Pay Climbs With Experience — Unevenly

The 1-3 year band dips below fresher pay before recovering — worth validating against real placement outcomes.

The Industries That Hire Most Also Pay Most

Banking, Consulting, and Manufacturing top both the hiring-volume and salary rankings — no volume/pay trade-off.

Financial and Sales MIS Pay Best

MIS Analyst sits close to the dataset's overall median — a reasonable proxy for "typical" MIS pay.

The Highest Pay Isn't in the Metros

Tier-2/3 industrial hubs — Bawal, Neemrana, Bhilai — report ranges rivaling or beating most metro salaries.

KEY INSIGHT

This Is a Large Market With a Narrow Path Through It

50,942 postings, 11,322 companies, 26 industries — but three industries, ten employers, and five job titles account for most of the real, fresher-accessible opportunity. Spreading placement effort evenly across this market wastes it.

3

Industries drive most of the demand

KEY INSIGHT

Fresher Success Comes Down to Five Roles, Not Twenty

MIS Analyst, Financial MIS Executive, Sales MIS Executive, Data MIS Executive, and Business Information Executive together cover roughly three-quarters of fresher-accessible demand. Training and counselling should be built around these five, explicitly.

~75%

Of fresher demand covered by 5 roles

KEY INSIGHT

Pay Follows Demand — Banking, Consulting, and Manufacturing Win on Both

The same three industries that generate the most hiring volume also pay the most on average. There's no trade-off between chasing volume and chasing compensation — they point the same direction.

₹8.4L

Banking's average pay — the market leader

The Five Roles to Build Around

Role	Fresher Openings	Strategic Focus	Avg. Pay
MIS Analyst	699	Broadest entry point; generalist reporting across departments	~₹3.0L
Financial MIS Executive	553	Most-demanded role overall; finance MIS & close-cycle reporting	~₹5.0L
Sales MIS Executive	374	CRM-driven sales & pipeline reporting (Zoho CRM/Analytics)	~₹4.6L
Data MIS Executive	314	Most technical track; SQL + Python bridge to Data Analyst	~₹1.8L
Business Information Executive	257	Cross-functional consolidation; consulting-adjacent	~₹1.2L

Together: ~75% of top-10 fresher-tagged openings on the dashboard.

CAREER ROADMAPS

The Five Roles, In Depth

Skills, certification, and a realistic growth path for each of the roles that actually hire freshers.

Financial MIS Executive

WHY THIS ROLE MATTERS

The single most-demanded title on the whole dashboard — tied directly to Banking's dominance and a fixed monthly close-cycle rhythm that every bank and BFSI employer needs covered.

TARGET INDUSTRIES

- Banking
- BFSI
- Consulting
- Manufacturing

CORE SKILLS TO BUILD

- Advanced Excel
- ERP (SAP / Tally)
- MIS Reporting
- Power BI
- Basic SQL

CAREER GROWTH PATH

553

Fresher Openings

~₹5.0L

Average Reported Pay

RECOMMENDED CERTIFICATION

Microsoft Office Specialist — Excel Expert (MO-211)

MIS Analyst

WHY THIS ROLE MATTERS

The widest door into this market — the single largest fresher-tagged title, drawing on the full baseline skill stack rather than one narrow specialty.

TARGET INDUSTRIES

Banking

Consulting

Manufacturing

IT Services

CORE SKILLS TO BUILD

Excel

SQL

Power BI

Data Analysis

Pivot Tables

CAREER GROWTH PATH

MIS Analyst

Senior MIS Analyst

Reporting / BI Analyst

699

Fresher Openings

~₹3.0L

Average Reported Pay

RECOMMENDED CERTIFICATION

Microsoft Power BI Data Analyst Associate
(PL-300)

Sales MIS Executive

WHY THIS ROLE MATTERS

Runs on a faster clock than the others — daily and weekly funnel, target-vs-achievement reporting built for commercial teams, not month-end cycles.

TARGET INDUSTRIES

E-commerce

Manufacturing

Logistics

Consulting

CORE SKILLS TO BUILD

Excel

Power BI

Zoho CRM / Analytics

Pivot Tables

CAREER GROWTH PATH

Sales MIS Executive

Senior Sales MIS Exec.

Sales Operations Manager

374

Fresher Openings

~₹4.6L

Average Reported Pay

RECOMMENDED CERTIFICATION

Zoho / HubSpot Sales Software Certification

Data MIS Executive

WHY THIS ROLE MATTERS

The most technical of the five — purpose-built to absorb SQL and Python demand, and the most direct bridge into a dedicated Data Analyst career.

TARGET INDUSTRIES

IT Services

Consulting

Banking

EdTech

CORE SKILLS TO BUILD

RECOMMENDED CERTIFICATION

**IIBA Entry Certificate in Business Analysis
(ECBA)**

Recommendation: Training Program Design

Curriculum built on the ranked skill lists

Excel, Reporting, SQL, Power BI, Data Analysis first — not a generic analytics syllabus.

Five role-based tracks, not one MIS course

Financial, Sales, Data, and Business Information tracks, mirroring where real demand sits.

Case studies drawn from the top 3 industries

Banking, Consulting, and Manufacturing content, using the dashboard's named top-10 employers.

Recommendation: Placement & Outreach

Direct outreach to the top 10 recruiters

Led by Accenture — the highest concentration of demand in the entire dataset.

Sequence drives around Banking, Consulting, Manufacturing

Not spread evenly across all 26 industries — the return on effort isn't uniform.

Extend into tier-2/3 industrial hubs

Bawal, Neemrana, Bhillai — real, under-tapped salary opportunity beyond the metros.

Recommendation: Career Counselling

Use the five roadmap roles as the counselling script

Move students off a generic "MIS Executive" ambition toward a specific, data-backed track.

Set realistic salary expectations early

Anchor to the ₹2–5L median band, not the ₹50L outlier ceiling, to reduce mid-placement drop-off.

Push OJT and internship exposure pre-graduation

85.1% of demand favors experience — this is what compresses that gap before graduation.

A Four-Phase Rollout

Phase 1

Weeks 1–4

Dashboard-to-Curriculum Audit

Map current training against top-10 skill rankings; identify gaps per role track.

Phase 2

Weeks 5–10

Role-Based Track Rollout

Launch 5 dedicated learning tracks with embedded portfolio projects.

Phase 3

Weeks 11–14

Placement Readiness

Resume workshops, mock interviews, outreach to top 10 recruiters.

Phase 4

Ongoing

Monitoring & Refresh

Track outcomes by role/industry/city; refresh data every intake cycle.

What Success Looks Like

For Students

- Better career planning, anchored to real demand
- Industry-relevant skills, not generic training
- Higher interview readiness
- More realistic salary expectations

For ACC

- Training aligned to what employers actually ask for
- Placement outreach focused where demand is real
- Stronger, evidence-based recruiter relationships
- Decisions traceable to data, not assumption

From Assumption to Evidence

Every recommendation in this briefing traces back to a specific figure in the dashboard.

Thank you
